# List of Data Network Identification Codes (DNIC)

## **Note from TSB**

1. The ITU-T Recommendation X.121 stipulates that the assignment of Data Country Codes (DCC) is administered by the ITU. Assignment of network digits to create Data Network Identification Codes (DNIC) will be made by each Administration. The ITU/TSB is to be notified of any new assignments, re-allocations or removals of network digits by completing the notification form shown in the last page of the Annex.
2. In accordance with ITU-T Recommendation X.121, details concerning the assignment of Data Network Identification Codes (DNIC) have been individually published in the ITU Operational Bulletin and then collected in a "List of Data Network Identification Codes (DNIC)".
3. The List of this year replaces the previous one published in the Annex to ITU Operational Bulletin No. 798 of 15 October 2003 and contains all amendments published in the ITU Operational Bulletins up to No. 818 of 15 August 2004.
4. In order to keep this List up-to-date, Administrations are requested to check the accuracy of the information published therein and to inform TSB of any changes that should be made for its updating.
5. For any new assignment of Data Network Identification Codes (DNIC), Administrations should fill in the notification form (see last page of the Annex) and return it to TSB, at the address indicated on the attached form.
6. For information, the List is also available on the ITU home page and can be consulted by subscribers by remote access.

7. The designations employed and the presentation of material in this List do not imply the expression of any opinion whatsoever on the part of the ITU concerning the legal status of any country or geographical area, or of its authorities.
